National Garden Clubs, Inc.  
**Environmental SCHOOL**

Series 10 – Course 3  
January 10-12, 2025

TEXAS GARDEN CLUBS, INC.

The NGC Environmental School Courses are designed to provide educational instruction to those who care about our natural world.

The school consists of a series of four courses. The goal of the Environmental Schools is to teach environmental literacy to cherish, protect and conserve the living earth. The courses teach participants appreciation of the natural world, encourages action for sustainable development and appreciation for the interrelation of all natural things. Land conservation, water conservation and air quality are particularly emphasized.

The courses are intended primarily for garden club members, but they are also open to the general public, requiring only the payment of a nominal fee. NGC affiliated Garden Club members completing the series of four courses are awarded the designation of NGC Environmental Consultant. A non-member student who has successfully completed the four courses may apply for Consultant Certification upon joining a garden club affiliated with NGC within one year after completing the series. Additional topics and areas of interest that may be covered are subjects such as Reconciliation Ecology (the science of inventing, establishing and maintaining new habitats in places where people live, work, and play), and creating backyard habitats to help endangered species such as pollinators and amphibians.
